## Free Content

In addition to our purchased content, the Snap Media Catalog contains several free educational media collections that enrich teaching and learning across all subjects and grade levels. Because these resources are integrated into our catalog, they are fully searchable and ready to be saved and shared through playlists. Following is a list of our free collections:

**Annenberg Media** offers over 1,500 videos-on-demand and a satellite TV channel you can view online. Topics include the arts, economics, geography, history, languages, literature, science and more.

**Project Gutenberg** offers over 46,000 free ebooks in the public domain (mostly classics) to download or read online.

**Docs Teach** is a collection of thousands of primary source documents that bring the past to life from billions of preserved documents at the National Archives.

**Khan Academy** offers practice exercises, instructional videos, and a personalized learning dashboard that empowers learners to study at their own pace both in and outside of the classroom. Subjects include math, science, computer programming, history, art history, and economics. In addition, the Khan Academy has partnered with institutions like NASA, The Museum of Modern Art, The California Academy of Sciences and MIT to offer specialized content.

**Library of Congress Digital Collections** offers access to all of the LOC digital resources including the American History & Culture Collection (which contains the American Memory Collection), Historic Newspapers, Performing Arts, the Veterans History Project, Historic Sound Recordings (which contains the National Jukebox Collection), Prints and Photographs, and many more.

**Pix 4 Learning** is a collection of thousands of copyright free and copyright friendly images and photographs for teachers and students.

Discovery Education offers thousands of standards-aligned learning resources including videos, images, lesson plans, virtual field trips, and tools for creating assignments, quizzes, and presentations.

It also contains RSS feeds to current events media and expansive collections of primary source documents. Discovery Education helps teachers to enrich instruction in all K-12 content areas.

NBC Learn is a collection of over 18,000 videos, primary sources, images, mini-documentaries, and text resources designed for classroom use. The historic content is comprised of actual footage from the NBC News archives since the late 1940s, and new content is updated daily with the latest current events from around the world. The interactive media player makes downloading, annotating, and citing resources easy as well!

CCC! Streaming Media offers thousands of video programs from content partners that include Bill Nye, Disney Educational Productions, National Geographic Education, National Science Foundation, BBC, and Weston Woods. Video programs are correlated to the Common Core Learning Standards with new content added every fall. The classroom length videos have also been edited into two-to-three minute clips for targeting instruction to specific learning objectives.

Learn 360 offers access to 100,000+ videos, audiobooks, music tracks, speeches, timelines, maps, science experiments, and math activities. The collection features many award winning programs such as the History Channel's Modern Marvels and History's Mysteries, the Biography Channel's Biography series, Reading Rainbow, and BBC News. In addition, content providers such as Films for the Humanities & Sciences and A&E make Learn 360 a rich resource for all subject areas.

PBS Learning Media Custom Edition includes all the access to PBS resources available through the free media-on-demand service, plus more than 800 hours of additional programming. Shows like Frontline, Nova, Nature, American Experience, PBS Kids, and specials from the Ken Burns Collection are now available in their entirety, along with an enhanced content management system.

Soundzabound offers royalty free music and audio themes in a variety of styles and genres, as well as collections of sound effects that can be used in presentations, video productions, podcasts, digital storytelling, plays, theatrical events, and sporting events. These sound resources ensure copyright safety for users and are compatible with virtually all software products and media creation tools.
