

# WELDER

## Training for Adults

This is an 100 hour Welding program providing instruction in basic welding skills and then moving into more advanced welding procedures. Students will gain hands-on experience using the tools, equipment and consumables of the welding trade and receive training of in-depth skills with concentration on techniques and proficiency in the welding field.

Areas of instruction include- Welding theory, blue print reading, welding symbols and practice in all aspects of welding to include Stick, Mig and Tig (SMAW, GMAW and GTAW). More advance skills such as out of position welding (vertical up and overhead), oxy-fuel cutting, plasma arc cutting and welding on materials such as stainless steel and aluminum will enhance the student's skill level and overall abilities.

Upon successful completion of this program a TST BOCES certificate will be issued.
